RE: Memorial Field Lighting Project at Deering High School, Portland Maine

Mr. Kelly:

The City of Portland awarded this project to you based on overall value as well as qualifications & experience. We feel that we made an excellent decision by selecting Enterprise Electric as the general contractor for our Musco lighting project.

As with any construction project, some problems were encountered. Enterprise Electric was there to provide ample suggestions to make corrections as necessary. Although it was not part of the contract, your forward thinking to provide additional service conduits and capacity in the electrical panel for future loads (baseball field, concession stand, and press box) was much appreciated.

We feel that Enterprise Electric provided a quality project, excellent customer service, professional installers, and clean well maintained equipment. We would gladly welcome you and Musco back for our next project.

I personally will be recommending you and your organization to any friends or colleagues who need a lighting installer. Your people are top notch, friendly and took time out their day to explain any section of the installation to any of us who asked. A job well done!

Sincerely,

A handwritten signature in black ink, appearing to read "Ethan Owens", written over a circular stamp or seal.
