Re: New Stonewood Data Center  
Freeport, Maine

Dear Jeff:

We would like to take this opportunity to thank you and the Enterprise Electric team for the excellent work performed at the L.L. Bean Data Center project. This was a very complicated electrical installation and your team, led by John Seigars and Dave White did a great job.

John managed your subcontractors effectively and gave valuable technical input for the numerous electrical challenges we encountered. Dave worked very closely with our Superintendent, and provided a first class, quality installation. The owner has acknowledged the high quality electrical installation during several tours of the facility that I have attended.

Please extend sincere appreciation from Dave Provencher and myself to John and Dave for their efforts. Also, please give my thanks to Paul Brown for his responsive support during the bidding and value engineering process.

Again, thank you for your efforts on this project. Enterprise Electric can be very proud of your work at the L.L. Bean Data Center.

Sincerely,

A handwritten signature in black ink, appearing to read 'Garret Bertolini', is written over a light blue horizontal line.

Garret Bertolini  
Senior Project Manager
