Re: Letter of Recommendation for MDOT Bayside Rail Trail Construction

To Whom It May Concern:

As the Project Construction Manager for the MDOT construction on a new multiuse trail in Portland; MDOT PIN #11844.00 – Bike / Pedestrian Rail Trail, Portland Maine; from March 2010 to September 2010 and it was a professional enjoyment to work with Jeff Kelly and his staff of Enterprise Electric, Inc. of Lisbon Falls, Maine. Enterprise Electric, Inc. was the subcontractor for the procurement and installation of electrical systems for the mile long bike / pedestrian trail construction. The Project ran through the Bayside area of Portland which is an area under redevelopment and adjacent to business and major City arteries. The electrical systems for the project consisted of trail lighting and power centers at the plaza areas. In addition towards the completion of the project it became evident that a signalization of the Franklin St. / Marginal Way intersection was required to provide a safe pedestrian crossing. This extra work was added to Enterprise Electric, Inc. scope of work.

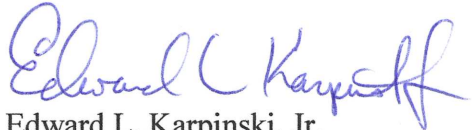

The electrical installation require a coordination effort with the trail construction and Enterprise Electric, Inc. stepped up and brought a high degree of professionalism and quality workmanship to the project during the new electrical construction. The lighting system and power center installation was handled properly and with the necessary expertise to passed all required inspections of the State, City and CMP. In addition the added scope of work; pedestrian signalization, was an extremely time sensitive issue which Enterprise Electric, Inc. procured and expedited the installation to the satisfaction of all parties. Mr. Kelly took the necessary efforts to ensure proper pricing of the extra work and continually kept the MDOT informed to the status of the equipment procure which had numerous long lead items. The workmanship of the installation was of high quality and done safely at the major intersection. The cutover and startup of the signalization went without any issue and was completed on time. Throughout this project Enterprise Electric, Inc. took the time to ensure that all steps of the electrical system installation were done to the highest degree of workmanship and quality to ensure that the trail lighting, power centers and pedestrian signalization would function well into the future.

Letter of Recommendation

It is a pleasure in providing this letter of recommendation for Mr. Kelly and Enterprise Electric, Inc. as a company that stands for excellence in every facet of their work. I would look forward to working with Enterprise Electric, Inc. on any future electrical construction project be it new construction or a renovation project. Enterprise Electric, Inc. consistently provided a level of effort and professionalism that is missing in other construction companies and therefore is a company you can depend upon and is respectful of an owner's needs and concerns.

If you have any further questions, please feel free to contact me or have any prospective client's call to discuss my experience with Enterprise Electric, Inc.

Sincerely,

A handwritten signature in blue ink that reads "Edward L. Karpinski, Jr." The signature is fluid and cursive, with the first name being the most prominent.
